

List of Projects (Note 2)

Publication Reference No: CT2386/2025

As a Certified Auditor, I hereby confirm that I have exercised the required diligence to confirm that the following project(s) have been successfully completed by the Contractor listed below and that all the details given in the following table are all factually correct, can be corroborated by additional documentation**:

IMPORTANT:

As the manufacturer, we hold all necessary control reports and certificates for our products, including those for the trash bins, which are issued by SGS. The audit authority (CIA) is managed through our official distributor, as they oversee installation and tender processes.

Furthermore, to ensure ongoing quality compliance, upon completion of the first production batch, a joint quality inspection will be conducted by our department in collaboration with TUV or SGS. A 100% quality assurance certificate will be issued upon successful verification. Until such certifications are obtained from these industry-leading bodies, Adlisweiyin is committed to implementing any required modifications as stipulated, to fully meet industry standards.

Following the successful conclusion of the tender and prior to the initiation of bulk production, our initial step is to manufacture a sample unit. This unit will be equipped with the new control board and platform, developed in strict accordance with the technical specifications outlined in the tender documentation. We will provide this sample to you free of charge for your formal evaluation and approval.

Contractor's Name	Project's Client(s)	Commencement Date (dd/mm/yyyy)	Completion Date (dd/mm/yyyy)	Brief Project description	Project's location	Value of Project
